

## CHARLES WARDEN

### What's in your American Gut sample?

#### Your most abundant microbes:

Taxonomy	Sample
Genus <i>WAL-1855D</i>	41.4%
Genus <i>Bacteroides</i>	26.2%
Genus <i>Prevotella</i>	3.9%
Family Enterobacteriaceae	3.7%

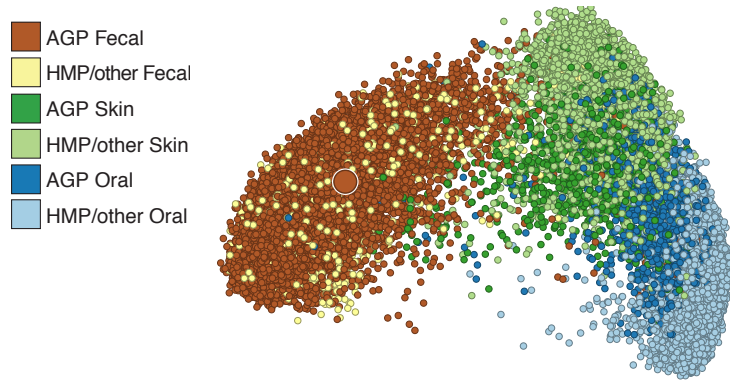

#### Your most enriched microbes:

Taxonomy	Sample	Population	Fold
Genus <i>Dialister</i>	3.07%	0.95%	3x
cont. Family Chromatiaceae	0.10%	0.03%	3x
Genus <i>Corynebacterium</i>	1.79%	0.37%	5x
Genus <i>Mobiluncus</i>	0.52%	0.00%	112x

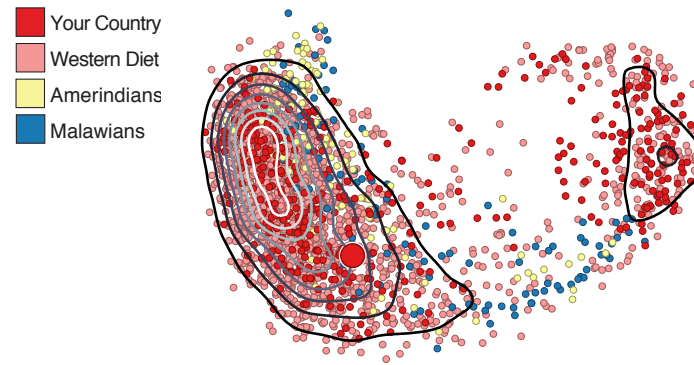

Your sample contained 6 rare taxa, including the following: Genus *Brevibacterium*, Genus *Agromyces*, Genus *Pseudoclavibacter*, Genus *Micrococcus*, Genus *Uliginosibacterium*.

### How do your gut microbes compare to others?
